

## Education & Health

### Working with you

Whether its playing fields or tranquil courtyards to recuperate in, Nurture understand the benefits of grounds and gardens.

Our risk and method statements describe each task and demonstrate what the reduction in risk would be by using the right protective clothing or machinery

Nurture landscapes are conscious that educational establishments and hospitals have a requirement to reduce their CO2 and to be aware of their Environment.

Nurture are currently working towards the Wildlife Trusts biodiversity benchmark.
